

2004 Compact Clothes Washer Energy Data

What do the energy consumption numbers on this table mean?

Energy consumption for these appliances is measured in kilowatt-hours (kWhs). The more energy an appliance consumes, the more it will cost to operate. One kilowatt-hour (kWh) is the amount of electrical energy supplied by one kilowatt over a one-hour period. It is the basic unit of measurement for electrical energy. Electricity bills are based in part on the number of kilowatt-hours a customer uses during a billing period. These consumption figures do not include the cost of water.

2004 Compact Clothes Washers

Brand	Model Number	Tub Capacity in Gallons	Tub Volume in Cubic Feet	Energy Consumption kWh / Year
Bosch Axxis	WFR2460UC	Compact	1.9	138
