

2007 Compact Clothes Washer Energy Data

What do the energy consumption numbers on this table mean?

Energy consumption for these appliances is measured in kilowatt-hours (kWhs). The more energy an appliance consumes, the more it will cost to operate. One kilowatt-hour (kWh) is the amount of electrical energy supplied by one kilowatt over a one-hour period. It is the basic unit of measurement for electrical energy. Electricity bills are based in part on the number of kilowatt-hours a customer uses during a billing period. These consumption figures do not include the cost of water.

2007 Compact Clothes Washers

Brand	Model Number	Tub Capacity	Tub Volume in Cubic Feet	Energy Consumption kWh / Year
Haier	XQG50-QF802	compact	1.50	203
Haier	HLP20E	compact	0.86	230
Haier	XQG50-11	compact	1.50	232
Summit	SPWD1160C	compact	1.50	232
Thor	WD9900A	compact	1.50	232
