

2011 Compact Clothes Washer Energy Data

What do the energy consumption numbers on this table mean?

Energy consumption for these appliances is measured in kilowatt-hours (kWh). The more energy an appliance consumes, the more it will cost to operate. One kilowatt-hour (kWh) is the amount of electrical energy supplied by one kilowatt over a one-hour period. It is the basic unit of measurement for electrical energy. Electricity bills are based in part on the number of kilowatt-hours a customer uses during a billing period. These consumption figures do not include the cost of water.

2011 Compact Clothes Washers

Brand	Model Number	Tub Capacity	Tub Volume in Cubic Feet	Energy Consumption kWh / Year
Avanti	W511	Compact	1.4	390
